#### METROPOLITAN SEWERAGE DISTRICT BOARD

#### SEPTEMBER 15, 1987

#### 1. CALL TO ORDER AND ROLL CALL:

The regular monthly meeting of the Metropolitan Sewerage District Board was held in the Boardroom of MSD's Administration building at 2 p.m. on Tuesday, September 15, 1987. Vice-Chairman Williams called the meeting to order at 2:00 p.m.

Vice-Chairman Williams and the following members were present: Aceto, Batts, Boggs, Dent, Dyson, Edwards, Pope, and Waddey. Others present were: W. H. Mull, P.E., Engineer-Manager, John Stevens and Walter Currie, General Counsel to the District, Dean Huber, Bill Morris, and Dr. Lloyd Robinson, representatives of the Consulting Engineers, Bob Ensley, MSD Staff, William Anderson with Ti-Caro, Stew Fink with Champion Finishing, Inc., Philip Carson, Esquire, and Leah Karpen representing the League of Women Voters.

#### 2. MINUTES OF AUGUST 18, 1987:

Mr. Edwards moved that the Board minutes of August 18, 1987, be approved as written. Mr. Ivey seconded the motion, and voice vote was unanimous in favor of the motion.

#### 3. REPORT OF ENGINEER-MANAGER:

#### a. REQUEST TO ADVERTISE FOR BIDS FOR PICK-UP TRUCK FOR LABOR CREW:

Mr. Mull requested approval from the Board to advertise for bids for one (1) pick-up truck for the MSD Labor Crew. Mr. Mull stated that if approved, the existing 1975 Chevrolet pick-up truck would be traded in on the new truck. This was included in the budget as a replacement vehicle. Mr. Waddey moved that the Board authorize approval for the District to advertise for bids for a pick-up truck for the MSD Labor Crew. Mr. Dyson seconded, and voice vote was unanimous in favor of the motion.

# b. RESULTS OF BID OPENING READVERTISEMENT - MAIN PLANT EXPANSION - PHASE III, SECTION 3A, 3B AND 3C:

Mr. Mull reviewed a letter with the Board from Hendon Engineering Associates regarding bids for Phase III of the Main Plant Expansion, received August 18 and September 3, 1987. Hendon recommends that the low bid received on September 3rd, for Section 3B be rejected due to the fact that Powell Construction did not currently have a valid North Carolina HVAC license. One bid was received on September 3rd for Section 3C, and it is recommended that this bid be rejected and readvertised. Mr. Currie stated that for Section 3 General Work and Section 3C Plumbing, the low bidder submitted a bond which is not in proper form. It is therefore recommended by General Counsel that the bids for Section 3, Section 3B and Section 3C be rejected and readvertised. The bid for Section 3A Electrical Equipment and Wiring is good, but the Board should not award this bid until the General Work has been awarded.

Mr. Ivey moved that the Board reject the bids for Section 3 General Work, Section 3B HVAC and Section 3C Plumbing, and authorize readvertisement. Mr. Batts seconded the motion, and roll call vote was unanimous in favor of the motion.

No action was taken on the bids for Section 3A Electrical.

#### c. RESULTS OF BID OPENING (AUGUST 20, 1987) - LAGOON:

Mr. Mull reported that the District advertised for bids on the above referenced project on August 10, 1987, with a bid opening date of August 20th, at 2:00 p.m. Three bids were received on this project. The apparent low bidder is Terry Brothers Construction Company in the amount of \$134,160. The

Minutes September 15, 1987 Page 2.

other two bids received were from Taylor & Murphy Construction Company in the amount of \$134,740.00 and Hobson Construction Company in the amount of \$154,780.00. Mr. Mull stated he has written a letter to Terry Brothers Construction Company tentatively awarding them the contract, subject to approval of the plans and specifications by the North Carolina Department of Natural Resources and Community Development - Environmental Management Commission.

Mr. Dent moved that the District award the Sludge Storage and Dewatering Reservoir Modifications contract to Terry Brothers Construction Company in the amount of \$134,160, contingent upon approval of the plans and specifications by the North Carolina Department of Natural Resources and Community Development - Environmental Management Commission. Mr. Boggs seconded the motion and roll call vote was unanimous in favor of the motion.

#### d. STATUS OF COMPLIANCE MONITORING - MAIN PLANT:

Mr. Mull reported that the Wastewater Treatment Plant was out of compliance last month on two of its' NPDES Permit parameters, BOD and Fecal Coliform Bacteria. It is believed that the BOD noncompliance was due to a plant in the area processing peaches causing a high BOD in the wastewater. Industrial waste samples are being analyzed and prior data examined to verify this.

#### e. ANNUAL USER CHARGE REPORT:

Mr. Mull reported that the Sewer Service Charge Committee met on Monday, September 14, 1987, to review the Annual User Charge Report. Mrs. Pope made a recommendation to the Board from the Sewer Service Charge Committee that the proposed increases for 1987-88 be accepted. At this time Dean Huber reviewed the Annual User Charge Report with the Board. Lengthy discussion followed between the Board members and Mr. Philip Carson, Attorney, representing various industries in the area regarding sewer service charges. Mr. Carson's concern is that the industrial share of the costs of operating the District is too high.

Mr. Dent recommended that the Chairman appoint a Committee to review the methodology used to calculate user charges insofar as it pertains to the division of costs between domestic and industrial users, with the possibility of having a seminar with various industries, if they are interested in so doing, to see if the District's method of billing should be changed, or if the District's rate structure should be changed. Mr. Edwards seconded the motion and voice vote was unanimous in favor of the motion.

Mr. Ivey moved that the Board adopt the Annual User Charge Report for 1987-88 prepared by Hendon Engineering Associates, Inc. Mr. Dent seconded the motion and roll call vote was unanimous in favor of the motion. A copy of the report is attached herewith and made a part of these minutes.

#### f. RESOLUTION ADOPTING USER CHARGES:

Mr. Mull stated that the Resolution adopting User Charges has been modified to reflect the 20% debt service coverage requirements of the 1985 Bond Order rather than the 50% coverage required under the original Bond resolution.

Minutes September 15, 1987 Page 3.

Mr. Dent moved that the Board adopt the User Charge Resolution which specifies Domestic rates of \$1.00 per CCF, with a minimum of \$3.00 per month, and Industrial rates as follows: Flow (Q) at \$0.224 per CCF, BOD at \$0.130 per pound, and SS at \$0.056 per pound, for Fiscal Year 1987-88. Mr. Boggs seconded the motion, and roll call vote was unanimous in favor of the motion. A copy of the Resolution is attached herewith and made a part of these minutes.

#### g. DRAFT OF PROPOSED REVISIONS TO SEWER USE ORDINANCE:

Dr. Lloyd Robinson reviewed the proposed changes to the MSD Sewer Use Ordinance with the Board. Mr. Stevens gave some background on the Sewer Use Ordinance, and what needs to be done to get the Ordinance changed.

Mrs. Pope moved that the Board adopt the Declaration of Intent to adopt a new Sewer Use Ordinance. Mr. Dent seconded, and roll call vote was unanimous in favor of the motion. The draft Ordinance will be distributed to all local governmental units for comment prior to actual adoption.

#### 4. REPORT OF OFFICERS:

None.

#### 5. REPORT OF COMMITTEES:

#### a. Hydro Committee - Mr. Dyson

(1) Concerns of French Broad Electric Membership Corporation Regarding Erratic River Flow:

Mr. Mull reported that letters have been received from the French Broad Electric Membership Corporation (FBEMC) concerning erratic river flows at its powerhouse. This past weekend the Hydro was down for its annual inspection by Voith Hydro, Inc. The District did notify the FBEMC and CP&L. While the Hydro was down, the computer program which controls the powerhouse was changed. Under the new method of operation, the units are set to come on and go off at 3" intervals, which is also adjusted to the crest of the dam so the water level will never get below the top of the dam. Hopefully, this will alleviate any problems at the plants down river.

#### (2) Bid Opening For Intake Screen Rake - September 1, 1987:

Mr. Mull stated that one bid was received on September 1 for the Intake Screen Rake from Acme Engineering Company in the amount of \$74,490.00. The bid is being reviewed by MSD General Counsel.

Subject to approval of General Counsel, the Hydro Committee recommends to the Board that the Board accept the bid of Acme Engineering Company in the amount of \$74,490.00.

Mr. Edwards moved that subject to approval of the General Counsel, the Board accept the bid of Acme Engineering Company in the amount of \$74,490. for the intake screen rake. Mr. Batts seconded the motion, and roll call vote was unanimous in favor of the motion.

Minutes September 15, 1987 Page 4.

#### (3) Status of Fish Habitat Study:

Mr. Mull reported that the Fish Habitat Study (between the dam and the power house in the river) has been received from RMC Muddy Run, which recommends 100 CFS over the dam. The report has been sent to the U.S. Fish and Wildlife Service asking it to review and approve it. It will probably be another 6 weeks before the MSD can get a meeting set-up with the U.S. Fish and Wildlife Service. Mr. Mull stated he would keep the Board abreast of this matter.

#### (4) STATUS OF VOITH CONCERNS:

The District has not been able to obtain any information from Voith concerning final payment, and therefore have not been able to make final payment.

Mr. Mull stated the Hydro Committee will talk with Jim Brewer after the annual inspection by Voith, to see if the District needs to meet with the Hydro Committee towards making a recommendation concerning final payment.

#### b. Sewer System Consolidation Committee Report - Mr. Aceto:

Mr. Aceto reported that the County Commissioners and MSD Board held a work session on August 26, 1987, and the County's major concern was the ceiling for user charges. Mr. Stevens stated he has to work with the County Attorney concerning this.

Mr. Stevens stated that the City of Asheville scheduled a work session with their own consultants today concerning sewer consolidation, and would be contacting MSD regarding a joint work session after reviewing their consultants' (CH2M Hill) findings.

#### 6. UNFINISHED BUSINESS:

None.

#### 7. NEW BUSINESS:

Mr. Mull reported a letter had been received from Sandra Chapin, representing a group called Sediment Control, requesting that the District adopt a resolution requesting that the County Commissioners enforce the County's Erosion Control Ordinance. The Board feels this is out of MSD's jurisdiction.

Mr. Aceto moved that the Board take this matter into consideration at its October meeting. Mr. Ivey seconded, and voice vote carried unanimously in favor of the motion.

Mr. Dent recommended that the District compliment the Friends of the River concerning the 1987 Riverfest. The Board members agreed that this would be a good idea. Mr. Stevens stated he will develop a Resolution for this matter, and present it at the next Board meeting.

#### 8. Date of Next Regular Meeting - October 20, 1987.

#### 9. Adjournment:

There being no further business, Vice-Chairman Williams adjourned the meeting at 4:25 p.m.

SECRETARY

I, Charles M. Dent, Secretary to the District Board of the Metropolitan Sewerage District of Buncombe County, North Carolina, DO HEREBY CERTIFY that the attached copy is a true and correct copy of the RESOLUTION adopted by the Metropolitan Sewerage District Board at their regular meeting held September 15, 1987.

WITNESS my hand and seal of said District this 15th day of September, 1987.

Signed by

Secretary, Metropolitan Sewerage District

Board of Buncombe County

# A RESOLUTION ADOPTING CHARGES FOR THE DISCHARGE OF DOMESTIC WASTEWATER AND INDUSTRIAL WASTES TO THE SANITARY SEWERAGE SYSTEM OF THE METROPOLITAN SEWERAGE DISTRICT OF BUNCOMBE COUNTY

WHEREAS, the District Board of the Metropolitan Sewerage District of Buncombe County, North Carolina, has heretofore adopted a Resolution adopting charges for the discharge of domestic wastewater and industrial wastes to the sanitary sewerage system of the Metropolitan Sewerage District of Buncombe County on the 15th day of April, 1975, and has amended said Resolution from time to time to adjust user charges for domestic and industrial users of the sewerage system and, the District Board now desires to revise said Resolution; and

WHEREAS, the District Board of the Metropolitan Sewerage District of Buncombe County, North Carolina, has heretofore adopted on May 15, 1984, an Ordinance for the purpose of regulating and controlling the discharge of wastewaters into the sanitary sewerage system tributary to wastewater treatment facilities of the District; and

WHEREAS, the Ordinance provides, among other things, for the control metering and determination of the characteristics of industrial wastes discharged to the sanitary sewerage system and for the subsequent adoption of a schedule of charges and fees for wastewater disposal services; and

WHEREAS, the District Board desires to provide for the equitable sharing of costs between domestic users and industrial users and to establish separate charges for the discharge of domestic and industrial wastewaters;

NOW, THEREFORE, BE IT HEREBY RESOLVED BY THE DISTRICT BOARD OF THE METROPOLITAN SEWERAGE DISTRICT OF BUNCOMBE COUNTY, as follows:

#### Section 1. DOMESTIC WASTEWATER CHARGE

#### Sec. 1.1 General

The domestic wastewater charge shall be applicable to all residential, commercial, and institutional customers discharging wastes with no unusual characteristics and to industries whose discharge consists of wastes solely from sanitary conveniences.

#### Sec. 1.2 Adjustment of Charge

The domestic wastewater charge shall be subject to periodic adjustment in conjunction with the industrial wastewater charges, as necessary to maintain adequate revenues and to meet operation and maintenance expenses, as shown by the Annual Budget for the current fiscal year, and the principal and interest requirements on account of the revenue bonds then outstanding, and plus either one-fifth of the principal and interest requirements or such larger sum as set forth in the Annual Budget for capital expenditures from the General Fund.

The procedure for determining from time to time the domestic users' share of costs and the resulting domestic wastewater charges shall be as outlined in Section 2 for the establishment of the industrial wastewater charges.

#### Section 1.3 Domestic Wastewater Charge Established

The domestic wastewater charge is hereby established as \$1.00 per 100 cubic feet, effective on the first regular meter reading date for each user after the adopting of this Resolution.

There shall be a minimum charge of \$3.00 per month.

There shall be no discounts for increased quantity.

#### Section 2 INDUSTRIAL WASTEWATER CHARGES

#### Section 2.1 General

Industrial wastewater charges shall be applied to the following user categories:

- A. <u>Industrial User</u> shall mean any nongovernmental user of publicly owned treatment works identified in the Standard Industrial Classification Manual, 1972, Office of Management and Budget, as amended and supplemented, under the following divisions:
  - a) Division A Agriculture,Forestry, and Fishing
  - b) Division B Mining
  - c) Division D Manufacturing
  - d) Division E Transportation
     Communication, Electric, Gas and Sanitary Services
  - e) Division I Services

A user in the Divisions listed may be excluded if it is determined that it will introduce into the system only segregated domestic wastes or wastes from sanitary conveniences.

B. <u>Industrial User</u> shall also mean any other industrial, commercial, or institutional user of the sanitary sewerage system and the District's treatment works who shall be so classified by the District by reason of the volume and/or characteristics of the wastes discharged or of the type, extent, and nature of the facilities used and required to provide service to such user.

#### Sec. 2.2 Charge Components

The billings to industrial users shall be based on separate charges for the following:

- A. Wastewater quantity (Q), per 100 cubic feet.
- B. Suspended solids (SS), per pound.
- C. Biochemical oxygen demand (B0D), per pound.

#### Sec. 2.3 Determination of Charges Annually

Sec. 2.31 The industrial wastewater charges shall be established annually based on the actual costs, as defined in Sec. 2.32, for the District's facilities for each preceding fiscal year. The charges so computed shall be the basis for estimating the monthly billings to each such customer for the following fiscal year. The charges collected shall be adjusted to actual costs at the end of each fiscal year and appropriate credits given against billings in the ensuing year, or additional billings made to each such customer, using the actual wastewater quantities and characteristics discharged by that customer during the preceding fiscal year as the basis for computing the adjusted charges.

The actual costs shall be determined as soon after the end of each fiscal year as possible; and, until such time, the charges for the current year shall be based on either the rates for the prior year or on estimated rates for the current year.

Sec. 2.32 The costs included in the computation of actual charges for the preceding fiscal year, or of estimated charges for an ensuing fiscal year, shall include the following:

- A. Operation and maintenance expenses.
- B. Interest and principal on outstanding bond issues.
- C. Coverage required by bond indentures on the debt service or such larger sum as set forth in the Annual Budget for capital expenditures from the General Fund.

Expenditures from the General Fund, using funds from prior years' deposits, are excluded from consideration in the industrial wastewater charges.

#### Section 2.4 Distribution of Costs and Computation of Unit Charges

Section 2.41 The total annual costs for the system shall recognize at least the following subdivisions:

A. Lateral sewer systems (if such are operated and maintained by the District)

- B. Trunk and intercepting sewer systems
- C. Pumping stations
- D. Wastewater treatment plants
- E. Billing Costs
- F. General Administration
- G. Hydroelectric Facility

Section 2.42 The costs shall be distributed to fairly recognize the contribution to each subdivision of the following basic classifications of users:

- A. Industrial users, including:
  - a) Industrial users as defined in Federal Guidelines.
  - b) Other industrial, commercial, or institutional users with unusual waste characteristics.
- B. Domestic users, including all residential, institutional, and commercial users not included in A b) above.

Sec. 2.43 The cost distribution shall permit the establishment of realistic total annual costs to the two basic classes of users for the following functions or purposes:

- A. Conveyance of wastewater (Q)
- B. Removal of BOD
- C. Removal of SS

Costs not directly related to any of the foregoing functions, such as administration and billing and collection, shall be distributed among the several functions by such other parameters as will produce a reasonable apportionment of such costs to each user.

Sec. 2.44 The cost distribution shall distinguish between current operation and maintenance costs and non-operating expenditures including principal and interest and debt service coverage required on the bonds outstanding and any additional sums budgeted for deposit to the General Fund. The distribution of debt service and debt

service coverage to functions as set forth in Section 2.43 shall be in accordance with the application of the bond funds to the construction of the facilities having such functions. The distribution of additional sums budgeted for deposit to the General Fund may recognize, in addition, the application of monies from the General Fund for extensions and improvements to the District's facilities.

Sec. 2.45 The annual distribution shall be in accord with the general principles set forth in "Financing and Charges for Wastewater Systems," a joint committee report of the American Public Works Association, American Society of Civil Engineers and Water Pollution Control Federation, 1973, and shall be subject to approval of the Consulting Engineers. Summarized data showing the development of the annual charges shall be maintained by the District, and copies thereof shall be made available to all industrial users and others upon request.

Sec. 2.46 The industrial wastewater charges are established initially for FY 1984-1988 as follows:

For Quantity \$\_\_\_\_ per 100 cubic feet

For Characteristics

BOD \$\_\_\_ per pound

Suspended Solids \$\_\_\_ per pound

The industrial wastewater charges shall become effective on the first regular meter reading date for each industrial user after July 1, 1987, or after any later date of written notice from the Engineer-Manager of classification as an industrial user.

#### Section 2.5 Classes of Industrial Users

The Engineer-Manager may establish classes of industrial users to whose wastewaters representative strengths are assigned. Such class wastewater characteristics may recognize analyses of representative users of each class in Buncombe County and/or typical data from other sources. To the extent practical, actual data for each industrial

user's wastewater shall be used. Any industrial user to whose wastewaters standard strength parameters have been applied may request analysis of its wastewater; and, upon determination of the characteristics on samples representative of the wastewater on not less than three working days, such characteristics shall be used in determining the charges until the wastewaters may again be sampled.

#### Section 2.6 Weighted Volume Charge

The Engineer-Manager may consolidate the component charges of the industrial wastewater charges into a single volume charge which includes the characteristic charges computed for a unit volume of 100 cubic feet. Such a weighted volume charge may be applicable to a class of users or to each user where its actual wastewater characteristics are known.

#### Section 2.7 Miscellaneous Provisions

Sec. 2.71 Industrial users exhibiting marked, seasonal load variations shall pay charges which recognize the dedication or reservation of capacity for the treatment of their seasonal peak operation loads and any unusual operation and maintenance costs directly related to such seasonal loads.

This provision shall apply only to those industrial users whose peak loads exceed 10 percent of any capacity parameter and are at least twice its off-season loads.

#### Section 4. SEVERABILITY

Sec. 4.01 If any section, clause, provision, or portion of this Resolution shall be held to be invalid or unconstitutional by any court of competent jurisdiction, such holding shall not affect any other section, clause provision, or portion of this Resolution.

#### Section 5. MAY BE AMENDED

Sec. 5.01 This Resolution may be amended from time to time, which amendments shall include, but need not be limited to, periodic adjustments to the domestic and industrial user charges, rates and fees.

Sec. 5.02 ADOPTED THIS September 15, 1987.

#### RESOLUTION

The District Board of the Metropolitan Sewerage District of Buncombe County North Carolina does hereby adopt the following Declaration of Intent;

"RESOLVED, the District Board of the Metropolitan Sewerage District of Buncombe County, North Carolina, does hereby declare its intent to adopt an Ordinance to regulate and control the Sewerage System operated by the Metropolitan Sewerage District. This Declaration of Intent is made pursuant to North Carolina General Statutes, 162A-81(13a). A copy of the Ordinance which the District Board intends to adopt is attached to this Declaration of Intent."

Adopted this 15th day of September, 1987.

VICE-CHAIRMAN, METROPOLITAN SEWERAGE DISTRICT BOARD OF BUNCOMBE COUNTY, NORTH CAROLINA

SECRETARY, METROPOLITAN SEWERAGE DISTRICT BOARD OF BUNCOMBE COUNTY, NORTH CAROLINA

> Mr. W. H. Mull, Engineer/Manager Metropolitan Sewerage District P. O. Box 8969 Asheville, North Carolina 28814

Subject: User Charge Analysis

Fiscal Year 1986-87

Dear Mr. Mull:

Metropolitan Dewenage Vistake of Buncombe County

Transmitted herewith is our report on the Industrial and Domestic User Charges for FY 1986-87 and proposed user charges for FY 1987-88.

Based on actual year end data and calculations presented in this report the user charges for last fiscal year (FY 1986-87) are summarized as follows:

#### INDUSTRY RATES

|          |              | YEAR END           |
|----------|--------------|--------------------|
|          | ADOPTED RATE | CALCULATED ACTUALS |
| Flow (Q) | \$ 0.180/CCF | \$ 0.1531/CCF      |
| BOD      | \$ 0.113/LB. | \$ 0.0937/LB.      |
| SS       | \$ 0.052/LB. | \$ 0.0353/LB.      |

#### DOMESTIC RATE

Flow (Q) \$ 0.75/CCF \$ 0.7334/CCF

The adopted industry rates resulted, on average, in billings to industry of approximately \$200,000 more than the calculated industry share of the actual costs. It is recommended that rebates or credits be given to industry in the usual manner.

The estimated industry rates for FY 1987-88 based on the adopted budget, a larger debt service obligation, and assuming no changes in industry flow and waste loads, are summarized as follows:

#### INDUSTRY RATES

| Flow (Q) | \$ 0.224/CCF |
|----------|--------------|
| BOD      | \$ 0.130/LB. |
| SS       | \$ 0.056/LB. |

Mr. W. H. Mull, Engineer/Manager Metropolitan Sewerage District Page Two

September 15, 1987

This report recommends adoption of the above industry rates for FY 1987-88 and made retroactive to July 1, 1987 as done in previous years.

The FY 1986-87 adopted domestic rate of  $75 \not < \$  per CCF produced approximately \$47,908 more than the calculated domestic share of the actual costs. This amount, along with \$224,517 of excess domestic revenue from FY 1985-86, deferred to FY 1987-88 is taken into account in calculating the recommended domestic user charge rate for FY 1987-88.

The recommended domestic user charge rate for FY 1987-88 is \$1.00 per CCF, starting October 1, 1987.

To be consistent with previously adopted policy, this report recommends that the minimum bill be \$3.00 per month (3 CCF x \$1.00/CCF) starting October 1, 1987 and until the domestic rate is changed further.

We would like to express our appreciation for the fine assistance of your staff in the preparation of this report.

Very truly yours,

HENDON ENGINEERING ASSOCIATES, INC.

### SEWER USER CHARGE REPORT (FISCAL YEAR 1986-87)

#### 1.0 <u>Introduction</u>

At the regular meeting of the Metropolitan Sewerage District (MSD) Board on May 17, 1983, the Board adopted a policy of setting the Domestic User Charge annually in a manner similar to the Industrial User Charges. This report provides the data and recommendations for Domestic Sewer User Rates.

#### 2.0 <u>User Charge Raw Data and Calculations</u>

All of the analysis input and calculation tables are bound in the back of this report as Appendix A. At the beginning of Appendix A there is a description of the contents of each table in Appendix A.

#### 3.0 <u>Historical & Current Results of User Charge Calculations</u>

A summary of the calculated  $\underline{actual}$  industry charges for FY 1986-87 are as follows:

## UNIT CHARGES TO INDUSTRY ACTUALS - FY 1986-87

| Cost Annual Parameter Discharge |   | Total Annual Cost<br>Allocated To<br>Industry | Unit<br>Charges                          |
|---------------------------------|---|---|--|
| Flow (Q)<br>BOD<br>SS           | 2,486,597/CCF<br>5,472,324/LBS<br>1.876,440/LBS | \$ 380,752<br>512,894<br><u>66,259</u>        | \$0.1531/CCF<br>0.0937/LB.<br>0.0353/LB. |
|                                 |   | \$ 959,905                                    |  |

A summary of the  $\underline{\text{estimated}}$  industry charges for FY 1987-88 are as follows:

# UNIT CHARGES TO INDUSTRY ESTIMATE - FY 1987-88

| Cost                  | Annual  | Total Annual Cost Allocated To Industry                | Unit  |
|-----------------------|---|--|---|
| <u>Parameter</u>      | Discharge                                       |  | Charges                                       |
| Flow (Q)<br>BOD<br>SS | 2,486,597/CCF<br>5,472,324/LBS<br>1,876,440/LBS | \$ 556,906<br>712,527<br><u>104,100</u><br>\$1,373,533 | <pre>\$0.2240/CCF 0.1302/LB. 0.0555/LB.</pre> |

Table A Shows a summary of costs and revenue for FY 1986-87.

Table B shows a summary of projected costs for FY 1987-88 and the estimated rates necessary to produce revenue to meet these costs.

Table C shows the Industry unit charges from previous reports and the charges calculated in this report.

Table D shows Domestic users charge data from previous reports and the user charges calculated in this report.

Table E is a copy of a table from the official statement document for the Series 1986A Bond Issue that shows projected user charges through 1990.

#### 4.0 <u>Minimum User Charge</u>

The District previously adopted a policy of increasing the minimum user charge based on the cost of 3 CCF flow at the current domestic rate. With the recommended new rate of \$1.00 per CCF, the minimum bill will be \$3.00.

#### Table A

# User Charge Analysis Metropolitan Sewerage District FY 1986-87 (Actuals)

|                                  | Total            | Industry    | Domestic    |
|----------------------------------|------------------|-------------|-------------|
| O & M Costs (WWTP & Hydro)       | \$1,272,409      | \$ 244,653  | \$1,027,756 |
| Ind. Waste Monitoring            | 143,468          | 143,468     |             |
| Debt Service (WWTP)              | 571,699          | 144,084     | 427,615     |
| Debt Service (Hydro)             | 789,489          | 218,364     | 571,125     |
| Debt Service Coverage            | 938,812          | 236,607     | 702,205     |
| Less Revenue (Sale of Power)     | <u>(98,596</u> ) | (27,271)    | (71,325)    |
|                                  | \$3,617,281      | \$ 959,905  | \$2,657,376 |
| Billable Flow (CCF)              |                  | 2,486,597   | 3,837,282   |

<sup>(1)</sup> Includes miscellaneous and interest income through FY 1985-86

<sup>(1)</sup> Includes miscernateous and interest income chrough 11 1905 66 (2) Assumes the issuance of \$21,000,000 in aggregate principal amount of Series 1986A Bonds bearing interest at an average annual rate of 8.00% with interest capitalized through July 1, 1987 and the first principal payment due on serial bonds on July 1, 1988

<sup>(3)</sup> Assumes the issuance of \$3,000,000 in aggregate principal amount of additional bonds bearing interest at an average annual rate of 8.00% with interest capitalized through July 1, 1989 and the first principal payment due on serial bonds on July 1, 1990

#### APPENDIX A

#### TABLE 1 - SYSTEM LOADS

This table shows the total system loads in terms of Flow, BOD, and Suspended Solids (SS) as received and treated by the MSD treatment plants. This data is taken from plant operating records during the last complete fiscal year.

#### TABLE 2 - INDUSTRY LOADS

This table shows the total waste loads in terms of Flow, BOD, and SS received <u>from industry</u> for treatment by the MSD plants. This data is taken from MSD industrial billing records during the last complete fiscal year.

#### TABLE 3 - DISTRIBUTION OF O & M COSTS

This table shows how the last completed fiscal years total Operation and Maintenance (0 & M) cost was expended by line item account and by Flow, BOD, SS, Customers, and Industrial Waste Monitoring (IWM). The total line item costs should be consistent with the fiscal year audit report. The distributions amoung Flow, BOD, SS, Customers and IWM is from a special accounting system maintained by MSD during the year that allocates all costs as they are incurred. The table also shows the current adopted 0 & M Budget with the projected distribution to Flow, BOD, SS, Customers and IWM. This distribution is based on the previous year actual percentage distribution. (Adjustments were made to take into account the fact that decreases in purchased power (Account Number 530) has no effect on the customer and industrial waste monitoring parameters.)

#### TABLE 4 - INPUT PARAMETERS

From Tables 1, 2, & 3 and other basic data a complete list of parameters are summarized. This is a complete listing of the raw data necessary to calculate user charges in accordance with the MSD adopted procedures. (ACTUALS FOR LAST COMPLETED FISCAL YEAR)

#### TABLE 5 - ALLOCATION OF LOADS TO USER GROUPS

This table shows the percentage use of the treatment system parameters between Industry customers and Domestic customers during the most recent completed fiscal year plus four years of historical data.

#### TABLE 6 - DISTRIBUTION OF TOTAL ANNUAL COSTS

This table divides all costs between the two user groups (Industrial & Domestic) by parameters Flow, BOD, SS, and Customers. (ACTUALS FOR LAST COMPLETED FISCAL YEAR)

#### TABLE 7 - UNIT COST DISTRIBUTION OF ANNUAL COSTS

This table divides costs, which were previously divided among parameters and user groups (Table 6), by annual quantities which results in the unit user charges. (ACTUALS FOR LAST COMPLETED FISCAL YEAR)

#### TABLE 8 - INPUT PARAMETERS

This table is a revised version of Table 4 showing input parameters for calculation of projected user charges for the current fiscal year. Usually, the only parameter changes are the current adopted 0 & M budget and the debt service requirement for the current fiscal year. Unless unusual circumstances dictate all other parameters are assumed unchanged. (ESTIMATES FOR CURRENT FISCAL YEAR)

TABLE 9 - DISTRIBUTION OF TOTAL ANNUAL COSTS

Same as Table 6 except calculations are based on Table 8 input parameters. (ESTIMATES FOR CURRENT FISCAL YEAR)

TABLE 10 - UNIT COST DISTRIBUTION OF ANNUAL COSTS

Same as Table 7 except calculations are based on Table 8 input parameters. (ESTIMATES FOR CURRENT FISCAL YEAR)

TABLE 11 - SERIES 1985 BOND ISSUE SCHEDULE \$14,420,000

This table is provided to show the schedule of principal and interest payments for the Series 1985 Bond Issue and the allocation between the Hydro Project and the Wastewater Treatement Plant Expansion.

TABLE 11A - SERIES 1986 BOND ISSUE SCHEDULE \$20,700,000

This table is provided to show the schedule of principal and interest payments for the Series 1986 Bond Issue.

TABLE 12 - DISTRIBUTION OF CAPITAL PROGRAM COST TO PARAMETERS

This table takes the MSD capital program cost estimate and allocates these costs to Parameters Flow, BOD, SS, Customers, and Industrial Waste Monitoring (IWM) for the purpose of allocating the present debt service and debt service coverage to the billable parameters.
